COHO is the composite industry's most comprehensive vacuum bag leak detection system. The result of Convergent's decades of industry experience, COHO monitors gas flow and bag pressure in real-time, instantly identifies leaks and provides tools to locate those leaks faster than ever. COHO's workflow integrated design and systematic approach take the guesswork out of vacuum bagging while automated reports and historical data provide unprecedented transparency into the process. Convergent offers a variety of options to suit any application.

COHO SYSTEM FEATURES

Series:	100	600	800
Instrumented Vacuum Lines	1	6	6, 12, 18, 24
Automated Decay Test Utility	✓	✓	✓
User-Definable Targets	✓	✓	✓
User Calibratable	✓	✓	✓
Visual Leak Localization		✓	✓
Automated Report Generation		✓	✓
Saves Historical Data		✓	✓
Wireless Roamer Display		Optional	2
Pressure Probe Monitoring Lines			6
Integrated Vacuum Regulation			✓
Instrumented Control Valves			✓
Supports Expansion Kits			✓
Cold Swappable Smart Manifolds			✓

Additional features, accessories, customization options and technical support packages are also available for all systems.
